# BP-U Style Battery

Introducing the Hawk-Woods BP-98X 14.4V Battery – a compact, high-performance power solution tailored for Sony Camcorders and Blackmagic Design Pyxis users. This battery offers unmatched flexibility, perfect for professionals needing reliable power during long shoots. With versatile output options, the BP-98X ensures all your gear stays powered up, keeping your workflow uninterrupted.

The Hawk-Woods BP-98X provides a robust, efficient, and portable power solution for filmmakers and videographers, keeping you powered and prepared for any project, big or small.

## Who is this aimed at?

Thanks to this battery's high draw current of 10A this battery can effortlessly keep up with the demand from cameras such as the Blackmagic Pyxis. This battery is also well suited to power other cameras like the Sony FS5, FS7, FX6, FX9, Z280 & Z190.

Our batteries cells are sourced from a reputable known **brand LG** with excellent performance. (3.62v rating / 10A discharge!)

# Features

## USB-C Power Delivery

The BP-98X includes a powerful **45W USB-C port**, ideal for charging devices like laptops, tablets, or smartphones quickly. It also supports charging the battery itself through this port, adding extra convenience.

## USB-A Power Output

In addition to USB-C, the BP-98X is equipped with a USB-A port perfect for powering smaller devices such as smartphones, tablets, or portable lights. This ensures you're ready for multiple charging needs on set.

## D-Tap Power Outputs

Equipped with two D-Tap ports, this battery can power various accessories simultaneously, offering unregulated 11-16.8V output—features usually found in larger V-mount or G-mount batteries.

## Clear Power Monitoring

The BP-98X comes with a clear four-LED power gauge and a straightforward button interface, making it easy to check your battery levels at a glance.

## Long Lasting Performance

With 98Wh capacity and 6600mAh, this battery is built for extended use, reducing the need for frequent recharges and supporting longer filming sessions with ease.

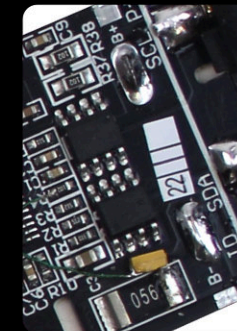

## Seamless Integration

Designed for easy compatibility with Hawk-Woods chargers & most industry standard chargers. The BP-98X effortlessly fits into your existing gear setup, ensuring hassle-free power management.

## Fast-Charging Capability

The BP-98X supports full 45W USB-C Power Delivery for charging and discharging. This allows users to fast-charge the battery significantly reducing downtime between shoots.

## Memory & Protection

The battery's microprocessor stores essential data for tracking, and the BP-98X offers Total Battery Protection, including safeguards for over-discharge, over-current, over-voltage, short-circuits, and thermal risks.

# Base Specification

Model:	BP-98X
Description:	14.4v Lithium-Ion On-Board battery
Battery Fitting:	BP-U Sony Replacement Battery
Nominal Voltage:	14.4V
Operation Voltage Range:	11-16.8v
Capacity:	6806mAh
Max Load:	10A
Dimensions (W x H x D):	103 x 41 x 70 mm
Weight:	472g
Cell Technology:	Lithium-Ion
Power Display:	4 Step LED Fuel Gauge
Operation Temperature:	-20°C to +60°C
Battery Management:	BMS
On-board Battery Diagnosis:	✓ (Via USB-C & Pocket Reader)
USB-A:	1x Output, 5v, 12W
USB-C:	1x Output, Full PD, 45W, Up to 2.2A
D-Tap:	2x Outputs
EAN-13 Bar code:	3660766673954
